

## **Call for Workshop Proposals**

**The 10<sup>th</sup> International Congress on Ultra Modern Telecommunications and Control Systems  
- ICUMT 2018**

<http://www.icumt.info>

**November 5 - 9, 2018**

**Moscow, Russia**

The workshop proceedings are planned to be included into the ICUMT 2018 proceedings and will be submitted to IEEE Xplore, Scopus and Web of Science databases.

ICUMT 2018 is an IEEE technically co-sponsored (approval pending) premier annual international Congress providing an open forum for researchers, engineers, network planners and service providers in telecommunications targeted on newly emerging systems, standards, services, and applications. ICUMT 2018 will consist of two main tracks, Telecommunications Track (ICUMT-T), and Control Systems, Automation and Robotics Track (ICUMT-CS). The aim of ICUMT is to bring together international players in telecommunications, robotics and control systems. The Congress will consist of open call Sessions, Workshops, Industrial Panels and Exhibitions. The web site of ICUMT 2018 can be found in <http://www.icumt.info/>.

The ICUMT 2018 Workshops Committee invites proposals for half or full day workshops affiliated with the main congress. For a Workshop proposal to be considered for acceptance as a part of ICUMT 2018 Congress, the proposed topic needs to be an emerging area in telecommunications or control systems, which is not yet covered in the regular sessions. The topic should be timely and significantly important to the technical audience. The proposals will be judged by the ability to introduce the area to large telecommunications and control systems community, further develop the area, and help establishing a larger research community beyond the area.

**Each Workshop proposal must include the following:**

- The name of the Workshop
- The names, addresses, and short bios of the organizers
- A brief description (up to one page long) of the technical issues that the Workshop's focus will be on, and the reasons why the Workshop is of interest at this time
- The names of potential Technical Program Committee members
- The planned format of the Workshop, including a strategy to facilitate lively discussions and involvement of the attendees
- If applicable, a description of past versions of the Workshop, including dates, organizers, number of submitted and accepted papers, and number of attendees
- An estimate of the expected number of submissions and attendees
- A tentative Call for Papers
- A description of the plans for publicity and Workshop Web site

Workshop proposals should be submitted, no later than **June 11, 2018**, by email (in PDF format) with the subject line "ICUMT 2018 Workshop Proposal" to the ICUMT 2018 congress secretariat ([info@icumt.info](mailto:info@icumt.info)).

**Periklis Chatzimisios, Ivan Ganchev, Yuliya Gaidamaka, Pavel Masek, Sergey Shorgin**
